

## How to Install TouchScreen Driver?

1. First of all, we should make sure the EC driver had been successfully installed into system.

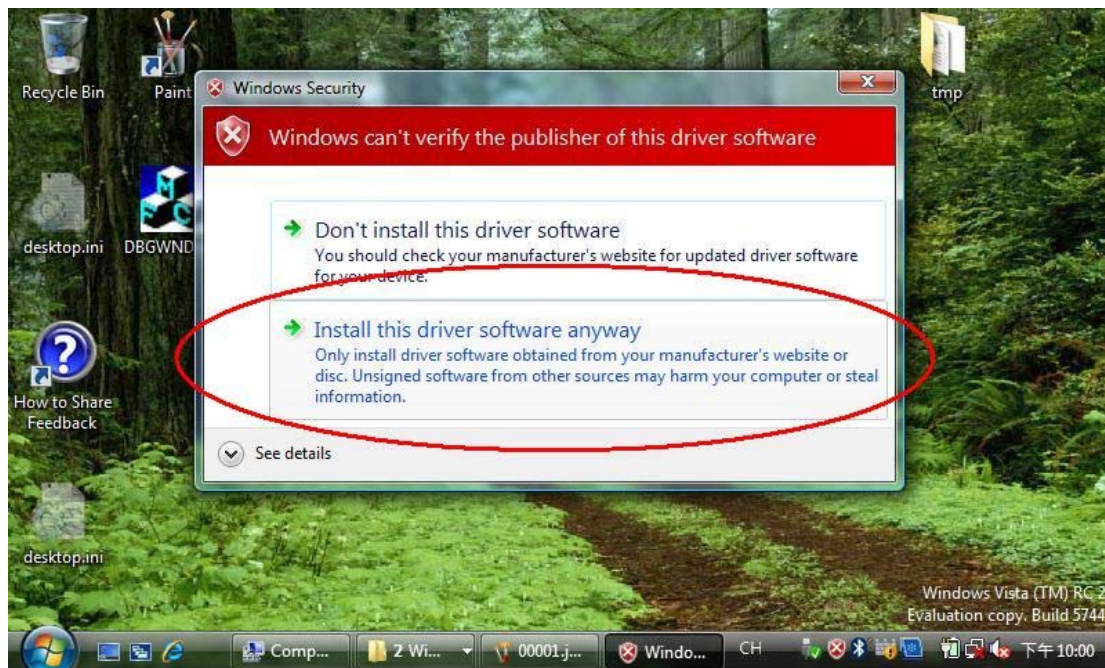

2. Change directory to the TouchScreen driver folder.
3. Move mouse upon driver execution file (ex: ATSV05123.exe), right click this file and select '**Run as administrator**'.

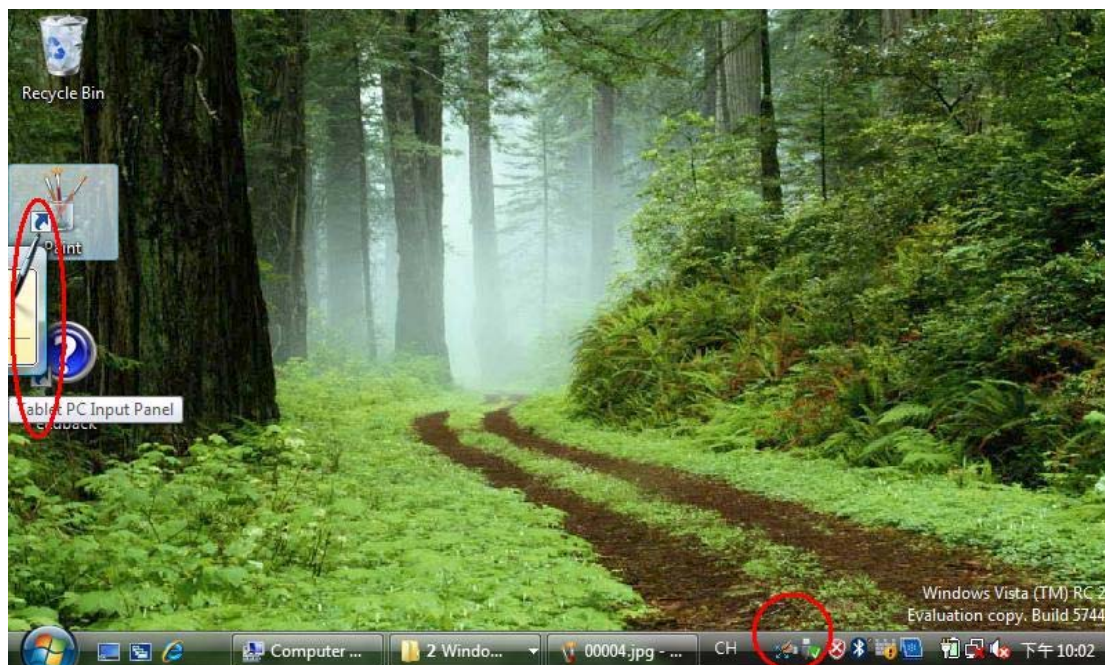

Driver package will be extracted automatically and beginning installation procedures.

4. During the installation procedures, a '**Windows Security**' window displays, Please select '**Install this driver software anyway**' item.

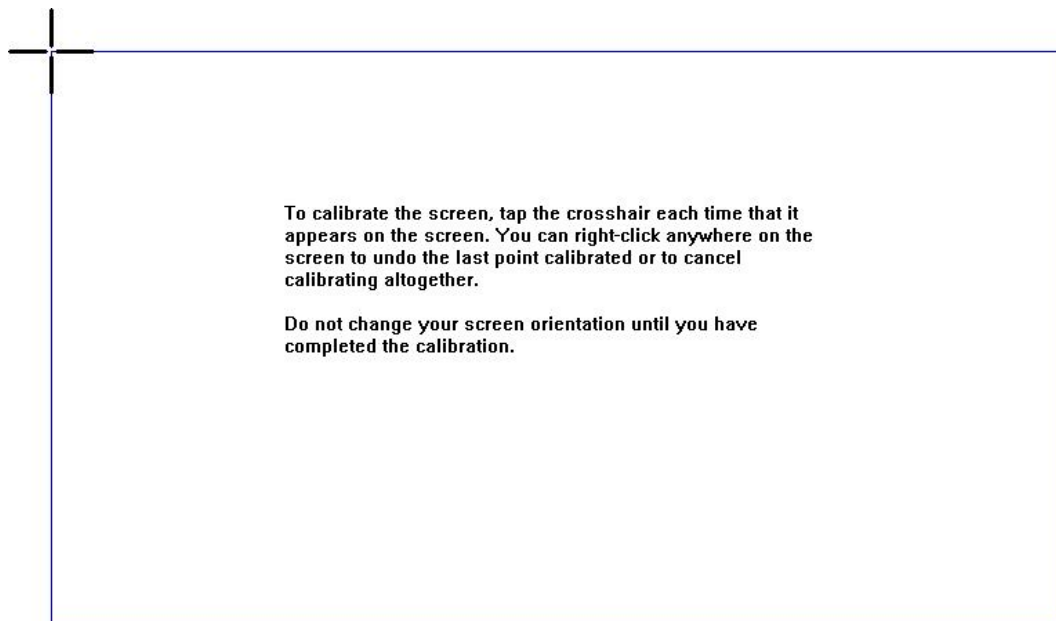

5. During the installation procedures, it might take times to finish overall processes, so after driver has been successfully installed, a '**Tablet PC input panel**' assistant appear at left side of toolbar.

6. After driver has been successfully installed, a calibration tool display automatically.  
Please finish the calibration procedure before we are going to use the Digitizer Device.

7. Driver Version Verification:

To make sure if driver had been successfully installed, we can check the driver information from the '**Computer Management**'->'**Human Interface Devices**', the '**HTC Hid Pen Device**' had been added. And we check additional driver information from this device property page.
